

APPROVED DIGITAL RESOURCES

The following lists the online educational services our staff use throughout the year. These online programs require student directory information to be used to access the material. Each program includes the grade level(s), description, student information needed, how the information is deleted in the future, and the privacy policy. In addition, to limit the platforms and information to only what is required, we have a strict web filter to help students while they work online at school.

Program	Grade	Description and Student Information Used
Google Workspace for Education	6 th -10 th	<ul style="list-style-type: none"> Google Classroom makes teaching more productive and meaningful by streamlining assignments, boosting collaboration, and fostering communication.
